Material Safety Data Sheet

ACRYLIC THINNER

Classified as hazardous according to criteria of NOHSC

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

<table>
<thead>
<tr>
<th>Product Name</th>
<th>ACRYLIC THINNER</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product Code</td>
<td>0545503</td>
</tr>
<tr>
<td>Company Name</td>
<td>Oilchem Pty Ltd</td>
</tr>
<tr>
<td>Address</td>
<td>55-57 Miller Road Epping Victoria 3076</td>
</tr>
<tr>
<td>Emergency Tel.</td>
<td>1800 638 556 24 hr</td>
</tr>
<tr>
<td>Telephone/Fax Number</td>
<td>Tel: (03) 9401-3377 Fax: (03) 9401-4657</td>
</tr>
<tr>
<td>Recommended Use</td>
<td>Industrial solvent.</td>
</tr>
<tr>
<td>Other Names</td>
<td>Not Available</td>
</tr>
<tr>
<td>Other Information</td>
<td>This Material Safety Data Sheet (MSDS) is accurate and up to date as possible. Since we cannot anticipate nor control the conditions under which this information may be used each user should review the information in the specific context of the information. We, the issuer of this information, will not be responsible for damages of any nature resulting from these or the reliance upon this information. No warranty expressed or implied are given other than those mandatory by Commonwealth, State or Territory Legislation</td>

2. HAZARDS IDENTIFICATION

<table>
<thead>
<tr>
<th>Hazard Classification</th>
<th>HAZARDOUS SUBSTANCE.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>DANGEROUS GOODS.</td>
</tr>
</tbody>
</table>
Hazard classification according to the criteria of NOHSC.
Dangerous goods classification according to the Australia Dangerous Goods Code.

Risk Phrase(s)  
R11 Highly flammable.  
R38 Irritating to skin.  
R63 Possible risk of harm to the unborn child.  
R65 Harmful: may cause lung damage if swallowed.  
R66 Repeated exposure may cause skin dryness and cracking.  
R67 Vapours may cause drowsiness and dizziness  
R48/20 Harmful: danger of serious damage to health by prolonged exposure through inhalation.  
R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Safety Phrase(s)  
S2 Keep out of reach of children.  
S9 Keep container in a well ventilated place.  
S16 Keep away from sources of ignition - No smoking.  
S23 Do not breathe gas/fumes/vapour/spray  
S51 Use only in well ventilated areas.  
S61 Avoid release to the environment. Refer to special instructions/safety data sheet.  
S24/25 Avoid contact with skin and eyes.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Characterization: Liquid

<table>
<thead>
<tr>
<th>Ingredients</th>

</tbody>
</table>

4. FIRST AID MEASURES

Inhalation  
If inhaled, remove from contaminated area. Apply artificial respiration if not breathing. Seek medical attention.

Ingestion  
DO NOT induce vomiting. Wash out mouth with water. Seek IMMEDIATE medical attention.

Skin  
Wash affected area thoroughly with soap and water. Remove contaminated clothing and wash before reuse or
discard. Seek medical attention.

Eye

If in eyes, hold eyelids apart and flush the eyes continuously with running water. Continue flushing for several minutes until all contaminants are washed off completely. Seek immediate medical attention.

First Aid Facilities

Eye wash station, safety shower and normal washroom facilities.

Advice to Doctor

Treat symptomatically.

Other Information

For advice, contact a Poisons Information Centre (Phone eg Australia 131 126)

5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media

Water spray, carbon dioxide, foam, dry chemical.

Hazards from Combustion Products

Under fire conditions this product may emit toxic and/or irritating fumes including carbon monoxide and carbon dioxide.

Specific Hazards

Highly flammable. Vapours are heavier than air and will travel to low-level areas and flashback. Precautions should be taken to eliminate the build up of explosive mixtures.

Hazchem Code

•3YE

Precautions in connection with Fire

Fire-fighters should wear full protective clothing and self contained breathing apparatus (SCBA) operated in positive pressure mode. Water spray may be used to keep fire exposed containers cool.

Unsuitable Extinguishing Media

Do NOT use high volume water jet.

6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures

Remove all sources of ignition. Increase ventilation. Evacuate all unprotected personnel. Wear full protective equipment and clothing to minimise exposure. If possible contain the spill. Place inert, non combustible, absorbent material onto spillage. Use clean non-sparking tools to collect the material and place into a suitable labelled container. If large quantities of this material enter the waterways contact the Environmental Protection Authority, or your local Waste Management Authority.

7. HANDLING AND STORAGE
Precautions for Safe Handling

Use in a well ventilated area. Prohibit sources of sparks, ignition and naked flames. Wear appropriate protective equipment. Build-up of vapour or mist in the working atmosphere must be prevented. DO NOT enter confined spaces where vapour or mist may have collected. Keep containers closed when not in use. Prevent accumulation of static electricity and earth all equipment. Practice good personal hygiene, that is, always wash hands after handling, and before eating, drinking, smoking or using the toilet facilities. Keep containers closed when not in use.

Conditions for Safe Storage

Highly flammable liquid for storage and handling purposes. Keep tightly closed in a dry, cool, bunded well-ventilated area, out of direct sunlight. Avoid sparks, flames and other ignition sources. Store away from incompatible materials. Provide electrical earthing of equipment and electrical equipment useable in explosive atmospheres. Do NOT pressurise, cut, heat or weld containers as they may contain hazardous residues. For information on the design of the store-room reference should be made to Australian Standard AS1940 - The storage and handling of flammable and combustible liquids. Reference should also be made to all Local, State and Federal regulations.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

National Exposure Standards

No exposure standards have been established for this material by the Australian National Occupational Health & Safety Commission (NOHSC), however, the available exposure limits on the ingredients as provided by NOHSC are as follows:

<table>
<thead>
<tr>
<th>Substance</th>
<th>TWA (ppm)</th>
<th>STEL (mg/m³)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toluene</td>
<td>50</td>
<td>191</td>
</tr>
<tr>
<td></td>
<td>150</td>
<td>574</td>
</tr>
</tbody>
</table>

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.

STEL (Short Term Exposure Limit): The average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

'Sk' Notice: Absorption through the skin may be a significant source of exposure. The exposure standard is invalidated if such contact should occur.

Biological Limit Values

No biological limit available

Engineering Controls

Provide sufficient ventilation to keep airborne levels to least possible levels. Where vapours or mists are generated, particularly in enclosed areas, and natural ventilation is inadequate, a flameproof exhaust ventilation system is recommended. Provide electrical earthing and equipment useable in explosive atmospheres. Refer to AS 1940 - The storage and handling
Respiratory Protection
Avoid breathing of vapours/mists. Where ventilation is inadequate and vapours/mists are generated, the use of an approved respirator with filter complying with AS/NZS 1715 and AS/NZS 1716 is recommended; however final choice of appropriate breathing protection is dependant upon actual airborne concentrations and the type of breathing protection required will vary according to individual circumstances. Expert advice may be required to make this decision. Reference should be made to Australian Standards AS/NZS 1715- Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716- Respiratory Protective Devices.

Eye Protection
Chemical safety glasses or face shield recommended as appropriate. Final choice of appropriate eye/face protection will vary according to individual circumstances including methods of handling or engineering controls as determined by appropriate risk assessments. Eye protection should conform to Australian/New Zealand Standard AS/NZS 1337- Eye Protectors for Industrial Applications.

Hand Protection
Impervious gloves recommended as appropriate. Eg. Nitrile. Final choice of appropriate glove type will vary according to individual circumstances, including methods of handling or engineering controls as determined by appropriate risk assessments. Refer to AS/NZS 2161 Occupational protective gloves- Selection, use and maintenance.

Body Protection
The use of impervious clothing and boots are recommended.

9. PHYSICAL AND CHEMICAL PROPERTIES

<table>
<thead>
<tr>
<th>Property</th>

<td>Not applicable</td>
</tr>
</tbody>
</table>
Flash Point  -1°C
Flammability Highly flammable.
Auto-Ignition Temperature Not available
Flammable Limits - Lower Not available
Flammable Limits - Upper Not available

10. STABILITY AND REACTIVITY

Chemical Stability Stable under normal conditions of storage and handling.
Conditions to Avoid Heat, direct sunlight, open flames or other sources of ignition.
Incompatible Materials Strong oxidising agents.
Hazardous Decomposition Products Thermal decomposition is highly dependent on conditions. Thermal decomposition may result in the release of toxic and/or irritating fumes including carbon monoxide, carbon dioxide and other organic compounds.

11. TOXICOLOGICAL INFORMATION

Toxicology Information No toxicology data available for this product.
Inhalation Harmful: danger of serious damage to health by prolonged exposure through inhalation. May cause irritation to the mucous membrane and upper airways. Symptoms may include possible sneezing, coughing, wheezing, shortness of breath, headache, dizziness, nausea, vomiting, incoordination and narcosis. Vapours may cause drowsiness and dizziness.
Ingestion Harmful—may cause lung damage if swallowed. Subsequent to ingestion or vomiting, small amounts of liquid aspirated into the respiratory system may cause severe pulmonary injury that may lead to death. May also cause irritation to the gastrointestinal system. Symptoms may include possible nausea, vomiting, diarrhoea and abdominal pain.
Skin May cause irritation to skin, which can result in redness and itching. Absorption through the skin, with symptoms paralleling those following inhalation and
ingestion exposures.

Eye
May cause irritation to eye which can result in redness, swelling, itching, stinging and excessive tearing.

Chronic Effects
Repeated exposure may cause skin dryness and cracking. Persistent abuse involving repeated and prolonged exposures to high concentrations of vapour ("sniffing") has been reported to result in central nervous system damage and eventually death.

Reproductive Toxicity
Possible risk of harm to the unborn child. This product is classified as Toxic to reproduction Category 3: substances that cause concern for humans owing to possible developmental toxicity effects, according to the supplier.

12. ECOLOGICAL INFORMATION

Ecotoxicity
Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Persistence / Degradability
No data is available for this material.

Mobility
No data is available for this material.

Environment Protection
Prevent substance from entering the environment.

13. DISPOSAL CONSIDERATIONS

Disposal Considerations
The disposal of the spilled or waste material must be done in accordance with applicable local and national regulations.

14. TRANSPORT INFORMATION

Transport Information
This material is classified as a Class 3 (Flammable Liquid) Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. Dangerous goods of Class 3 (Flammable Liquid) are incompatible in a placard load with any of the following:
- Class 1, Explosive
- Class 2.1, Flammable Gas, if both the Class 3 and Class 2.1 dangerous goods are in bulk
- Class 2.3, Toxic Gas
- Class 4.2, Spontaneously Combustible Substance
- Class 5.1, Oxidising Agent
- Class 5.2, Organic Peroxide
- Class 6.1, Toxic and Class 6.2 Infectious Substances, if the Class 3 dangerous goods are nitromethane
- Class 7, Radioactive Substance
15. REGULATORY INFORMATION

Regulatory Information

Classified as Hazardous according to criteria of the National Occupational Health & Safety Commission (NOHSC) Australia.
Classified as a Scheduled Poison S5 according to the Standard for the Uniform Scheduling of Drugs and Poisons (SUSDP).

Poisons Schedule

S5

Hazard Category

Harmful, Irritant, Highly Flammable, Dangerous for the environment
